

A woman's silhouette is centered in the foreground, with a large pink and black monarch butterfly perched on her head. She is surrounded by a vast field of colorful butterflies in various species and colors, including orange, purple, blue, and red. The background is a soft, glowing light, suggesting a sunrise or sunset over a garden.

**9 FANTASTIC PLANTS TO
SPICE UP YOUR GARDEN!**

Gardening brings transformative changes, nurturing our souls and fostering a deep connection to nature. It teaches us patience, resilience, and the joy of nurturing life. Through gardening, we find solace, inspiration, and a renewed appreciation for the beauty that surrounds us, creating a space of tranquility and personal growth.

Rose

June is the perfect time to plant roses, but it is important to consider the specific climate and growing conditions in your region. It is also advisable to choose container-grown roses or those with well-established root systems for better success. Roses are among the oldest cultivated flowers known to humankind and have been designated the official flower of the United States in 1986. [Read more about Rose here.](#)

Coneflower

Planting coneflowers in June is a great way to add vibrant color and beauty to your garden. It allows the coneflower to establish its roots before the peak of summer, resulting in strong growth and abundant blooms. Seize the moment and plant coneflowers in June to enjoy their presence and attract pollinators.

Coreopsis

Coreopsis is a Native American wildflower that brings vibrant colors and sturdiness to any yard or garden. It is a magnet for butterflies, beneficial insects, and birds, and can thrive in diverse climates, from northern regions to the Deep South. Embrace the allure of Coreopsis and create a welcoming haven for both nature and garden enthusiasts.

Canna Lilies

Cannas (KAN-ahs) are tall, showy ornamental plants with lush towers of banana-like leaves and bright flowers resembling gladioli or orchids. They are perennial only in the deep South and southern California, where winters are mild. They grow 2-8 feet tall and spread 18 inches across. Flowers are similar to gladiolus blooms and cluster at the ends of tall, cane-like stems. They bloom in mid to late summer or early fall, depending on the variety.

Zinnias

Zinnias are annual flowers whose Mexican heritage is reflected in their bright colors, prolific bloom, and ability to handle hot, dry summer weather. They complete their life cycle in a single growing season and die when frost arrives, making them annuals. They have coarse, rough, bold leaves and grow in pairs opposite from each other on sturdy stems.

Daylily

Hemerocallis hybrids, or modern daylilies, are low-maintenance perennials that bloom for several weeks and produce beautiful flowers every day.

They can be grown from New England to California and as far north as the Canadian border, but some varieties thrive in particular climates more than others. Dormant plants die back during the winter, so it is important to carefully review catalogs when ordering plants by mail.

Sea Holly

Sea Holly will give your garden a hint of coastal magic. This extraordinary perennial will add a special charm to your landscape with its silvery-blue foliage and spiky blooms. Sea Holly is a tough plant that thrives in sandy soil and coastal areas in spite of its delicate appearance. It attracts helpful pollinators like bees and butterflies and can withstand salt spray and strong winds
