

PROTECT YOUR PLANTS FROM COMMON GARDEN PESTS

swipe

IDENTIFY THE PESTS

Learn to recognize common garden pests like aphids, slugs, and whiteflies.

USE PHYSICAL BARRIERS

Install fences, nets, or row covers to protect your plants from pests.

INTRODUCE BENEFICIAL INSECTS

Attract ladybugs, lacewings, or parasitic wasps to control pest populations.

APPLY ORGANIC SPRAYS

Use natural insecticidal soaps or neem oil to keep pests at bay.

ROTATE CROPS

Avoid planting the same crop in the same spot each year to deter pests.

**What methods do you use
to protect your plants from
pests?**

Let's discuss!
